PROFESSIONAL SUMMARY

Entry-level full-Stack JavaScript Developer with 18 months of intensive training in theoretical and hands-on technical environments including developing 7 real-world projects through all phases of the Software Development Life Cycle. An effective team member who communicates closely with the team while developing a project. The largest project resulted in creating the E-Commerce web app. I created this app using the NX tool(typescript-based mono repo tool built on top of Angular Devkit). I use express Node.JS for designing my REST API and MongoDB as my Database.

ACADEMIC PROJECTS (2020 - 2021)

Community Service App:

This app will establish skilled workers to offer their services to other people in their community/city. Only authenticated users will be able to use the system. The idea is to allow users within the same city to communicate, ask for services, and/or provide the service.

Technologies: Angular, REST APIs, Routing, HTTP.

E-Shop-App:

This application is more helpful to those shop owners who have more than one store and run them independently. The Owner can have access to all the stores. The owner has to login with their account and she/he can look over the what is going on the store.

Technologies: Angular, REST APIs, Routing, HTTP.

Feedback System:

This App will help the organization to manage the feedback and regularly update the status of the feedback. The users who gave the feedback will also be able to track if her/his feedback was resolved or not. There will be only one user who manages the feedback and she/he will forward to the respective department.

Technologies: Angular, REST APIs, Redux, Routing, HTTP.

Online Farmers Market:

A web application for the farmers to add their products, browse orders and contact the customer once the order is shipped or ready for pick up. The farmers will have their own account to add/browse for the products and customer will have their own account to do the shopping.

Technologies: React, JavaScript, REST APIs, Hooks, Redux.

CORE COMPETENCIES

Javascript, NodeJS, MongoDB, React, Angular

ADDITIONAL SKILLS

Problem Solving, Collaborative Teamwork, Creativity, Leadership Skills, Workplace Conflict Management Skills
