PROFESSIONAL SUMMARY

Entry-level Full Stack JavaScript Developer with 18 months of intensive training in theoretical and hands-on technical environments including developing 7 projects through all phases of Software Development Life Cycle. Effective team member who communicates closely with the team while developing a project. Largest project resulted in updating and getting deep knowledge of front/backend technologies including Angular, NodeJS, ExpressJS & MongoDB (NoSQL DB), and used services such as AWS and use Redux to keep application state in a single store. I managed the app to be able to send an email notification to the user who reserves the appointment.

ACADEMIC PROJECTS (2020 - 2021)

Farmers Online Shopping:

An application which helps farmers to sell their products to their customers and the customers can buy products from multiple farmers. All farmers have their own account which enables them to post their products and prices. All customers have their own accounts similar to farmers which allows them to buy a product from any of the farmers.

Technologies: React, JavaScript, REST APIs, Hooks, Axios.

MIU Book Store:

In this project, I used NodeJS and ExpressJS on the backend and MongoDB as my document database. For the frontend I just used HTML5 and CSS3 which will fetch data from the backend using a third party library called Axios used to make HTTP requests from NodeJS. The web app allows the user to rent a book, put favorite books, list available books etc.

Technologies: JavaScript, REST APIs, HTTP, Ajax, Axios, Higher Order Components.

Student Course Registration:

The mobile app developed from this project enables the user to sign up and login to the account and list out the available courses for registration, add the course, edit the course and cancel the registration with in the limited period of time. I have developed the app using Angular as a frontend api, NodeJS, MongoDB, Mongoose, ExpressJS as backend

Technologies: Angular, JavaScript, REST APIs, Hooks, Routing, HTTP, Ajax, Higher Order Components.

CORE COMPETENCIES

NodeJS, MongoDB, React, React Native, Angular

ADDITIONAL SKILLS

Problem Solving, Adaptability, Collaborative Teamwork, Effective Communication, Self - Motivated
