### PROFESSIONAL SUMMARY

I'm a full-stack JavaScript developer with hands on experience in designing, developing, and implementing applications and solutions using a range of technologies and programming languages (Angular, React, SQL and MongoDB). In addition to this, I have 6 years of professional experience working in accounting. I have excellent time management skills combined with a full range of interpersonal skills. I'm a great team player and love working in a fast-paced environment. Having just completed my masters in software development degree, I'm excited for my next opportunity in the marketplace.

### ACADEMIC PROJECTS (2021 - 2022)

#### Mobile Pet Vaccine records

This mobile app enables the user to keep track of pet veterinary records, vaccines, etc. It features the ability to add or remove pets, questions for the vet and alerts for vaccinations. In addition to the technologies listed below, I used MongoDB for backend and AsyncStorage for persisting the app state.

**Technologies:** React, React Native, JavaScript, HTTP and Axios

#### Pet Adoption

Breeders could post pets for adoptions (add, delete, edit and view all requests from buyers). Buyers were able to browse and select the nearest pet available to their location and send requests to the breeder. Only authenticated users had access and the app could perform all CRUD (Create, Read, Update, Delete).

**Technologies:** Angular, REST APIs, Routing Axios.

#### E-Commerce Website

This was a website intended for simple online shopping. On the frontend It displayed the name, price, quantity, color and size and the buyer can use the shopping cart to select, checkout and purchase the clothes. An administrative dashboard managed (CRUD) all users, products and transactions.

**Technologies:** React, JavaScript, REST APIs, Routing, HTTP, Axios

#### My Personal Website

My personal website was created using AWS for back-end and Angular for front-end. I deployed it in S3. I built the backend using lambda, DynamoDB, API Gateway, SNS, and SQS. This website includes CloudFront in Route S3.

**Technologies:** Angular, Javascript, Cloud Deployment, HTTP

### CORE COMPETENCIES

Javascript, ES6, TypeScript, NodeJS, Angular, React, React Native, Mongoose, MongoDB, MySQL, DynamoDB, Visual Studio Code, Git, Postman, Agile leadership or Scrum Master, HTMLS, CSS, HTTP, Bootstrap

### ADDITIONAL SKILLS

Problem Solving, Collaborative Teamwork, Critical Thinking, Handling Pressure, Self – Motivated

## PROFESSIONAL EXPERIENCE

### Modular Team - Walmart

Dallas, TX | December 2018 - January 2021

I worked as a modular specialist, I planned displays, coordinated the arrangement of merchandise, and set up in-store models of furniture and clothing. I was responsible for the set-up of racks and units used for merchandising equipment, and work in conjunction with sales associates, merchandising staff, managers, and area directors.

I developed strong organizational capabilities together with time-management abilities. I planned the workday and major in-store reassignments of inventory.

### Accountant - Independent

Dallas, TX | October 2016 - January 2018

I worked as an accountant. Maintained full charge of accounting functions, coded and posted daily and monthly journal entries, prepared monthly bank reconciliations, annual / periodic financial statements and reports. Reconciled accounts and resolved accounting discrepancies by conducting necessary investigation. Prepared detailed and summarized reports on payroll and expenses. Filed and archived documents in an organized location for easy reference

### Cashier Supervisor - AmeriPark

Los Angeles, California | January 2010 - January 2014

Maintained friendly and professional customer service.

Organized, stocked, and maintained the teller window area.

Scheduled staffing for different teller window areas.

Pulled daily reports from different teller window areas.

Maintained record balance with actual money and daily reports from print out.

Handled various accounting transactions.

Resolved many customer problems.
