## Master's Projects (2021 – 2023)

---

**Goal Tracker:** Developed a MEAN stack application that is used to create, update, or delete a goal with description, progress bar, deadline, and steps. Under the steps, title, description, status, and deadline are included as well. It can track due dates and change the step's color once the due date has passed.

**Leveraged Technologies:** angular, angular directives and pipes, typescript, node js, express, mongo DB, Git, GitHub, Postman, jwt

**Restaurant Management:** Designed and implemented a MEAN stack application for managers and hosts for managing and taking meal orders respectively.

**Leveraged Technologies:** angular, angular material, typescript, node js, express, mongo DB, RESTful API, stripe, Git, GitHub, Postman

**Movie Rental:** Created a MERN stack application where users can browse, search, and rent online movies. In addition, it calculates discounts based on rental days. Furthermore, an administrator can add, update and delete movies from the database.

**Leveraged Technologies:** react, RESTful API, axios, hooks, node js, express, Git, GitHub, Postman, mongo DB, fetch

**Portfolio:** Developed and deployed a personal website with a contact me page. Whenever a message is sent, email will be received, and the message will be stored in a DynamoDB as well.

**Leveraged Technologies:** react, AWS lambda, API Gateway, SNS, AWS Route 53, CloudFront, S3 Bucket
